JMeter Execution on Jira

By Nidish Rao

Steps for execution of JMeter Task on Jira follow the below steps :

Step 1: Creating a New Project : Select as Scrum.

Project templates

Software development

Plan, track and release great software. Get up and running quickly with templates that suit the way your team works. Plus, integrations for DevOps teams that want to connect work across their entire toolchain.

Kanban
Visualize and advance your project forward using issues on a powerful board.

Scrum LAST CREATED
Sprint toward your project goals with a board, backlog, and roadmap.

Bug tracking
Manage a list of development tasks and bugs.

Step 2: Creating a New Project : Select a company- managed project

Step 3: Creating a New Project- Adding name of project as Jmeter with Key : "JMETER"

Step 4: Creating a new Version in Backlog (JMeter Version 1)

Create Version

Project*

Jmeter ▾

Name*

JMeter Version 1

Description

Start Date

6/Oct/22 📅

Release date

10/Oct/22 📅

Create   Cancel

Step 5: Creating a new Epic in Backlog (JMeter Epic 1)

Create Epic

Import issues   •••

Project*

Jmeter (JMETER)   ⌄

Issue type*

⚡ Epic   ⌄

Learn more

Epic Name*

JMeter Epic 1

Provide a short name to identify this epic.

Summary*

Epic for JMeter
